

51. (New) The method set forth in claim 49, comprising predicting the brightness of a first color to within 0.3 foot-lamberts for at least one input signal to the color display device.

---

**REMARKS**

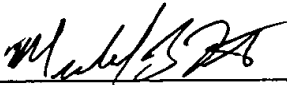

In this Amendment, the Applicant has cancelled claims 1-19, 30 and 33. New claims 35-51 have been added. Accordingly, claims 35-51 are pending in the Application. Further, the Title has been amended. That amendment is set forth with revision markings in the attached Appendix A.

In the prior Final Office Action, the Examiner rejected all of the pending claims on a variety of prior art grounds. The Applicant does not concede that those rejections were correct. Nonetheless, the Applicant has canceled the previous claims and presented new claims 35-51 to more completely and clearly set forth the Applicant's invention. The Applicant respectfully submits that new claims 35-51 are allowable over the prior art of record and requests an indication acknowledging such allowability from the Examiner.

If the Examiner believes that a telephonic interview will help speed this application toward issuance, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,

Date: February 7, 2003
